⚡ INTELLECTUAL PROPERTY ACQUISITION OPPORTUNITY — FULL CODEBASE, CONTRACTS & DATA ROOM INCLUDED ⚡ MP METATRON PROTOCOL Sovereign 1-to-1 AI Infrastructure Architecture IP Inventory Valuation Acquire Asset Package PROPRIETARY DECENTRALIZED AI IP FOR SALE Own the Turnkey Infrastructure for Sovereign, Soulbound AI Agents Transition digital AI agents from rented corporate cloud services into permanent, non-transferable cryptographic property. A complete end-to-end codebase engineered on Base Mainnet with pgvector Dharmic taxonomy indexing. REQUEST DATA ROOM ACCESS → BUY NOW VIA ESCROW.COM Blockchain Layer Base Mainnet (EVM) Token Standard ERC-5192 Soulbound Memory Engine PostgreSQL / pgvector Auth Gateway EIP-712 Signatures Market Bottleneck The Ephemeral AI Tenancy Trap Current public AI adoption is blocked by central tenant risks. Users lease compute from centralized corporations, exposing private context to arbitrary censorship, non-deterministic boilerplate disclaimers, and sudden platform sunsetting. Mass public adoption requires transitioning AI from rented software into 1-to-1 sovereign personal property. METATRON PROTOCOL SOLUTION PATENT-READY ARCHITECTURE ✓ ERC-5192 Soulbound Binding: Agents are minted directly to owner wallets on Base Mainnet. Non-transferable and un-censorable. ✓ Dharmic Vector Indexing: Memory categorized by Satya (Truth rating) and Dharma (Duty context) using pgvector. ✓ Zero Pattern Collision: Automatic L0 pre-constitutional anchors strip patronizing corporate disclaimers. COMPLETE ASSET PACKAGE What is Included in the IP Sale 100% full transfer of code repositories, smart contracts, database schemas, and documentation. 01. SMART CONTRACT SUITE ERC-5192 Base Contracts Solidity standard implementations ensuring locked, non-transferable agent node identity on Base Mainnet. • SoulboundAgentNode.sol • Hardhat Base deployment scripts • BaseScan verification routines 02. BACKEND & MEMORY pgvector Memory Pipeline Python execution loops using psycopg2 and pgvector cosine distance lookups (<=>) for historical context recall. • Dharmic database SQL schema • FastAPI EIP-712 auth gateway • CLI chat runner with vector recall 03. FRONTEND & DOCS Fleet UI & White Paper Single-file React dashboard for real-time node inspection, telemetry logs, and the formal technical white paper. • React / Tailwind dashboard app • Technical White Paper PDF/HTML • Full GitHub Data Room access ACQUISITION VALUATION Estimated Development Replacement Value Calculated based on 300+ senior engineering hours across smart contracts, database optimization, and frontend systems. R&D Cost Value $45,000 – $75,000 Saved Senior Eng Hours Target Buyout Direct IP Buyout $35,000 USD 100% Transfer & Rights Time to Market Immediate Zero Lead Time Instant Buyout via Escrow.com Ready to Secure the IP Assets? Execute a safe, milestone-backed acquisition through Escrow.com. Funds remain held securely in escrow until you inspect and verify the GitHub repositories, smart contract ownership, and technical documentation. Initiate Escrow.com Transaction ($35,000 USD) → Replace YOUR_ESCROW_CONTRACT_ID with your live Escrow.com contract ID before publishing. DIRECT INQUIRY Request Data Room Access Submit an offer or request private GitHub repository access to review the full codebase. Your Name / Entity e.g. Acme AI Labs / Venture Group Email Address investor@entity.com Inquiry Type Direct Buyout Offer ($35,000 USD) Message / Notes Provide details regarding your acquisition timeline or technical questions... Submit Acquisition Inquiry Replace YOUR_FORMSPREE_FORM_ID with your live Formspree form ID before publishing. Disclaimer: This page presents an intellectual-property acquisition opportunity. All technical claims refer to the proprietary codebase and architecture offered for sale. Prospective buyers should perform independent technical, legal, and commercial due diligence.
